

Slow Motion (video) in Sony Vegas

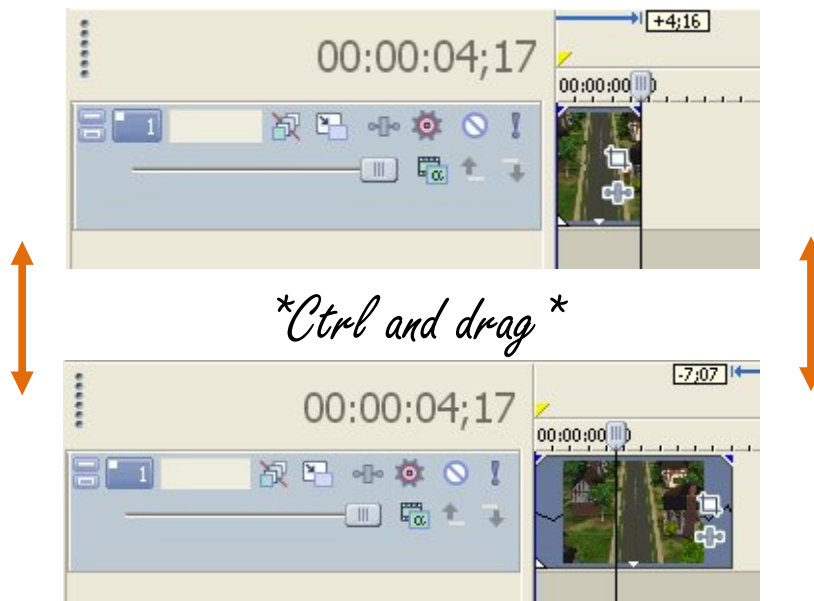

Difficulty: Easy

You are going to need: Sony Vegas 6, 7 or 8. A video.

First, import your video clip.

Second, press the  button on the video track, then right click on the video and choose 'Switches' > 'Disable Resample'.

Third, click at the end of the video clip and drag, depending on how slow you want it to be.

You should now have super smooth slow motion, when rendered.

DONE!
